IOF MEMBERS WORK TOGETHER TO MAKE BONE, JOINT AND MUSCLE HEALTH A WORLDWIDE PRIORITY
Looking back, 2012 was undoubtedly among the most dynamic and productive years in IOF’s history. Above all, it was marked by unprecedented outreach on many fronts.

In terms of scope, IOF moved beyond the borders of osteoporosis to reach out to the chronic disease community, while expanding its remit to encompass muscle and joint health.

With the election of a new Board of Governance, for the first time with equal representation from each region, IOF completed the final phase of its regional development strategy. This was further strengthened by Regional Advisory Councils in all three regions in which IOF maintains regional offices.

For the first time, IOF regional meetings were successfully staged in four regions of the world: Asia-Pacific, Europe, Latin America and the Middle East & Africa. In all, more than 7000 health care professionals profited directly from outstanding opportunities for education and research through IOF meetings and training courses. The new ‘IOF Young Investigator Mentoring Programme’, held as pilot programmes in Jordan and Kuala Lumpur, was well received by the participants. This programme underscores IOF’s strong commitment to the promotion of science and research across cultures and borders.

IOF’s Committee of Scientific Advisor Working Groups continued their impressive work, publishing nine reviews and statements on topics of importance to the bone, muscle and joint field. And, there’s much more in the pipeline for 2013!

In regard to public outreach, IOF launched a stimulating new website featuring modern design and new interactive mapping content. The new site serves as a portal which offers individual membership options and online access to IOF’s scientific publications. Over time IOF will build a community of many thousands of individual members in the musculoskeletal field.

The World Osteoporosis Day ‘Stop at One’ campaign resounded widely, with significant media impact that reached millions of consumers and health care professionals on all continents. The theme underlined IOF’s dedication to secondary fracture prevention and its new ‘Capture the Fracture’ programme to promote the implementation of fracture liaison services worldwide.

These many new developments have set the stage for the coming year, during which we look forward to consolidating and expanding our effective programmes in science and public outreach.
THE ORGANIZATION

ABOUT IOF

The International Osteoporosis Foundation’s (IOF) is the world’s leading NGO dedicated to the fight against osteoporosis and related musculoskeletal diseases.

IOF was founded in 1998 as a not-for-profit, international non-governmental foundation registered in Switzerland. The Foundation functions as a global alliance of patient, medical and research societies, scientists, healthcare professionals and corporate partners across many fields.

IOF headquarters are in Nyon, Switzerland, with regional representations in Latin America (Buenos Aires, Argentina), Asia-Pacific (Singapore), Middle East & Africa (Dubai, UAE). IOF has been granted Roster Consultative Status with the Economic and Social Council of the United Nations.

MISSION

IOF’s mission is to promote the maintenance of bone, muscle and joint health as a worldwide priority.

GOALS

• Motivate people to take action to maintain musculoskeletal health and prevent, diagnose and treat bone, muscle and joint disorders

• Foster the education and training of physicians and allied health care professionals in the field of musculoskeletal health and bone, muscle and joint disorders

• Lobby for policy change so that musculoskeletal health and the prevention, diagnosis and treatment of bone, muscle and joint disorders becomes standard worldwide

• Promote medical innovation and to improve patient care in the field of musculoskeletal health

• Support and maintain contacts with institutions or societies having similar objectives

THREE MEMBERSHIP GROUPS*

Committee of National Societies (CNS)
Comprises patient and medical societies dedicated to osteoporosis and bone health. In 2012 the CNS included 209 member societies from 94 countries, regions or territories across all continents.

Committee of Scientific Advisors (CSA)
Comprises 122 of the world’s top research and clinical experts, elected to the committee by their peers on the basis of scientific merit and experience. The CSA ensures that IOF has an influential and important global reach in the science and medical arena.

Committee of Corporate Advisors (CCA)
Represents 32 companies from diverse areas of activity, including leading companies in pharmaceuticals, medical diagnostics, consumer products, food and nutrition, banking, and advertising.

For further information and for a full listing of the committees, membership benefits and how to join, visit the IOF website.

* membership as of December 2012
NEW BOARD OF GOVERNANCE ELECTED

A new Board structure designed to give equal representation to all five regions (each region with four elected members) was introduced in 2012. The newly elected members of the Board, as well as ex-officio members, took their seats for the first time in March 2012, beginning a four year term until 2016. In Asia-Pacific, Latin America, Middle East & Africa, where IOF has regional administrative offices, two of the four Board members in each region were elected by the regional CNS and the remaining two were elected by the global membership. In Europe and North America, where IOF does not have administrative offices, all four seats were elected by the global membership.

CHANGES IN IOF SENIOR MANAGEMENT

The IOF Executive Committee regretfully accepted the resignation of IOF Chief Executive Officer (CEO) Patrice McKenney effective June 30, 2012. Mrs McKenney was commended for her invaluable services to IOF over the past three years. Former IOF Chief Operating Officer (COO) Judy Stenmark was appointed as CEO (as of July 1, 2012). A new COO is expected to join IOF in March 2013.
A Global Membership Dedicated to Musculoskeletal Health

* members listed according to IOF Regions and based on membership in December 2012.
The full list of IOF members can be viewed on the IOF website at www.iofbonehealth.org/about-us
IOF BUILD A WORLDWIDE COMMUNITY OF INDIVIDUAL MEMBERS

With the launch of its new website platform (see page 23), IOF also launched a new membership option for interested individuals around the world. Via the website, individuals can register as IOF members (at no charge) to receive considerable benefits, including online access to the IOF journals Archives of Osteoporosis and Progress in Osteoporosis, regular e-news including the monthly bulletin ‘BoneBlast’, and discounts at IOF Scientific Meetings. For a yearly fee of 50 USD (25 USD for WHO designated low-income countries) individuals can opt for the ‘Pro’ membership which additionally gives online access to the journals Osteoporosis International and Calcified Tissue International.

IOF REGIONALIZATION PROGRAMME PROGRESSING WELL

In 2012, IOF completed the important process of regionalization that began in 2009. Now, with four elected Board members from each of the five regions, there is equitable representation at IOF’s highest level of governance.

IOF’s Regional Programme is designed to facilitate collaboration among the member associations in three designated regions: Asia Pacific, Middle East & Africa, and Latin America. These are the regions which benefit from a local IOF regional office. Latin America held its first elections for a Regional Advisory Council (RAC) in 2012, so that all three of the targeted regions now have well-functioning RAC councils (see list in the respective regions shown in this report).

Through its regionalization programme IOF aims to:

- **DEVELOP** a strong regional structure based on collaboration of local societies, with programmes and policies targeted to the regions’ specific needs
- **ASSIST** the regions to acquire the resources needed to educate health professionals and empower patients
- **STRENGTHEN** osteoporosis associations worldwide to better serve the needs of the patients and health professionals in the region

CCA  • Inner Mongolia Mengniu Dairy (Group) Co., Ltd.

IOF YOUNG INVESTIGATOR AWARDS & MENTORING PROGRAMME

At the IOF Regionals in Kuala Lumpur, young researchers from five countries won prestigious IOF awards valued at 1000 USD each for their highest ranking abstracts. The winners were from Australia, China, India, Pakistan and Singapore.

In Kuala Lumpur, on December 13, 2012, IOF held the 2nd IOF Young Investigator Mentoring Programme. This important new initiative of IOF, held for the first time in the Asia-Pacific Region, invites a select number of young investigators to attend an exclusive hands-on course led by a renowned faculty of experts. The course teaches practical skills and provides insightful feedback that are of great value to the young scientists as they further their careers in bone research.

Rhonda Ng

• Edith Lau HK, CHN
• Hajime Orimo JPN
• Ego Seeman AUS

The eminent Australian rheumatologist and longstanding CSA member passed away on March 31, 2012. Professor Sambrook had been elected to the IOF Regional Advisory Council for the Asia-Pacific Region.

IOF POLICY ACTION IN ASIA

Former IOF CEO Patrice McKenney joined the Malaysian Osteoporosis Society and the Osteoporosis Awareness Society of Kuala Lumpur at a meeting with the office of the Minister of Health in Kuala Lumpur to encourage the government of Malaysia to give osteoporosis greater priority within the healthcare system. The CEO also met with the Health Promotion Board in Singapore to talk about public education initiatives around bone health and the relevance of osteoporosis as a chronic disease.
3RD ASIA-PACIFIC OSTEOPOROSIS MEETING KUALA LUMPUR

The IOF Regionals 3rd Asia-Pacific Osteoporosis Meeting in Kuala Lumpur from December 13-16, 2012 was the largest IOF Regionals meeting to date. At the Opening Ceremony, IOF was honoured to welcome the Deputy Minister of Health of Malaysia, YB Datuk Rosnah bt. Hj. Abd. Rashid Shirlin; His Excellency Tun Dato’ Seri Utama (Dr) Haji Abdul Rahman bin Haji Abbas, Governor of Penang; and world-star Dato Seri Michelle Yeoh. With a high-quality scientific programme and more than 400 abstracts the Meeting was a key educational and research event in the Region.

MICHELLE YEOH LEADS MEDIA EVENT IN KUALA LUMPUR

At a press event preceding the scientific meeting in Kuala Lumpur, internationally acclaimed actress and bone health advocate Michelle Yeoh urged Malaysians to take action to look after their bone health. Her statements attracted considerable local and regional media coverage on behalf of bone health.
WORLD OSTEOPOROSIS DAY EVENTS ACROSS ASIA

National societies across the region marked World Osteoporosis Day 2012 through a wide array of public awareness events, conferences, media campaigns and health professional workshops. Overall, millions of citizens across the region heard the ‘Stop at One’ message of secondary fracture prevention.

Of the many excellent World Osteoporosis Day events organized throughout Asia, one of the most impressive was a huge event in Jakarta, Indonesia, hosted by the Indonesian PERWATUSI and PEROSI with IOF and Fonterra Brands. IOF CEO Judy Stenmark joined the Indonesian Deputy Minister of Health and other policy makers and VIPs as key speakers.

IOF-ECCEO12 IN BORDEAUX – EUROPE’S KEY BONE EVENT

The European Congress on Osteoporosis & Osteoarthritis, held in Bordeaux, France from March 21-24, 2012, was one of the premier bone events of the year. Attracting more than 4000 delegates, the Congress presented the latest clinical research and offered a high quality scientific programme of plenary lectures, topical symposia, meet-the-expert sessions, satellite symposia and a large exhibition. In conjunction with the Congress, the 2nd IOF-ESCEO Pre-Clinical Symposium featured the latest in translational research.

IOF JOINS EY2012 COALITION

IOF became a member of the European Year for Active Ageing and Solidarity between Generations coalition, a group of some 40 European organizations aiming to promote innovative solutions to economic and social challenges facing the ageing European population.

MUSCULOSKELETAL HEALTH ROUNDTABLE IN CYPRUS

Hosted by IOF and the Cyprus Society Against Osteoporosis and Musculoskeletal Diseases, the Musculoskeletal Health Roundtable held in Cyprus on September 6, 2012 was honoured to welcome Dr Stavros Malas, Cyprus Minister of Health. Dr Malas stated, “healthy ageing is a top priority for the Cyprus EU Presidency.”

NCD ALLIANCE NETWORK ACHIEVES BREAKTHROUGH

At the end of May 2012 in Geneva, long-term efforts by NCD advocates resulted in the 65th World Health Assembly adopting the ‘25 by 25’ target which aims to reduce preventable deaths from non-communicable diseases (NCDs) by 25 per cent by 2025. IOF applauded this important outcome, which recognizes the burden of non-communicable diseases, including musculoskeletal disorders, on the health of the global population.
SNAP! EXHIBITION IN GENEVA

The first outdoor, month-long exhibition of Snap! the breaking spine took place along Quai Wilson on Lake Leman in Geneva. Snap! is IOF’s unique photographic exhibit which reveals the daily life of six people living with spinal osteoporosis in Brazil, Canada, India, Jordan and Switzerland. The exhibition was also shown alongside IOF’s information desk at Place de la Fusterie during World Osteoporosis Day 2012.

www.iofsnap.org

WORLD OSTEOPOROSIS DAY HIGHLIGHTS IN EUROPE

European members of IOF’s Committee of National Societies carried out numerous events, to spread the World Osteoporosis Day message of secondary fracture prevention to patients, the general public, health professionals and media. For example, patient forums and community or hospital events were held in Bulgaria, Czech Republic, Denmark, Greece, Germany, Hungary, Italy, The Netherlands, Portugal, Spain, Romania, Russia, Switzerland. For complete information visit: www.worldosteporosisday.org/tags/europe

Her Royal Highness The Duchess of Cornwall, President of the UK’s National Osteoporosis Society, was photographed with fracture patients on the occasion of World Osteoporosis Day.

A press event launching the Capture the Fracture report (see page 25) in Europe was organized by IOF with Prof Maria-Luisa Brandi of F.I.R.M.O and in collaboration with S.E. Monsignor Zygmunt Zimoski. Other notable speakers included IOF President John Kanis, SIOT President Prof. M. D’Imporzano and football legend Paolo Rossi. The October 18 event resulted in high profile coverage of osteoporosis in Italy.
IOF REGIONALS IN SÃO PAULO

The 1st Latin America Osteoporosis Meeting in São Paulo attracted more than 700 specialists and general practitioners from over 32 countries. Held in Portuguese, Spanish and English, the meeting presented recent research from the region and provided an update on latest clinical practice.

LATIN AMERICA REGIONAL AUDIT

Launched on May 24, the Audit was the first to compile epidemiological data and quantify the burden of osteoporosis and fractures in Latin America. Covering 14 countries in the region, the Audit warned of the impending explosion in the number of fractures as the ageing population surges in most countries. In some countries hip fractures will more than double by 2050. The media launch generated extensive coverage in television and print throughout the region.

IOF YOUNG INVESTIGATOR AWARDS

The IOF Sergio Ragi-Eis Young Investigator Award was awarded to the five highest scoring abstracts by researchers under the age of 40. The award, named in honour of the late Brazilian clinician and researcher, was awarded to young researchers from Brazil and Argentina.

In 2012, the bone community in Brazil lost two respected and well-loved members. IOF Board Member Rubem Lederman died on April 16 at the age of 76. He had served on the Board from 1999 to March 2012. Well known rheumatologist Sergio Ragi Eis, died on February 22. Dr. Raigí had had been elected to the IOF Regional Advisory Council in Latin America.
WORLD OSTEOPOROSIS DAY IN LATIN AMERICA

Activities were carried out in some 10 countries in Latin America, including in Argentina, Brazil, Costa Rica, Chile, Ecuador, Mexico, Panama, Venezuela, and Uruguay. The World Osteoporosis Day website was available in Spanish and Portuguese to reach out to Latin American communities.

IOF joined the Sociedad Argentina de Osteología y Metabolismo Mineral (AAOMM) and the Fundación de Investigaciones Metabólicas (FIM) to stage a World Osteoporosis Day walk in a central location in Buenos Aires. For complete information visit www.worldosteoporosisd.org/tags/latin-america

Serving the online community in Latin America

The HUES.O.S website at www.ayudaatushuesos.com brings information to the general public in Spanish, providing prevention tips, recipes, the One Minute Risk Test, and much more.

IOF TRAINING COURSES IN LATIN AMERICA

Osteoporosis and Celiac Disease Course
The multidisciplinary course focuses on issues related to osteoporosis and the treatment of patients with celiac disease. The 3º course was held on October 26, in Buenos Aires, Argentina - a total of 80 professionals were trained.

IOF Paediatric Bone Health Training Course
This one-day course designed for paediatricians and other health professionals was held in Buenos Aires in July 2012 and in Mexico City in August 2012, with more than 250 participants.

IOF Symposia
Health professionals participated at informative IOF-ied symposia held in conjunction with national societies. Symposia were held at the XII Asociación Mexicana de Metabolismo Óseo y Mineral Congress in Veracruz, Mexico and the XXX International Congress on Obstetrics and Gynecology in Buenos Aires, Argentina.
The 2nd Middle East & Africa Osteoporosis Meeting & PAOC6, which closed on Sunday September 30 was a resounding success, attracting more than 550 delegates to the spectacular venue at the Dead Sea, Jordan. Speakers at the Opening Ceremony included the Jordanian Minister of Health Dr Abdul Latif Wreikat (middle in picture), and the Palestinian Health Minister, Dr Hani Abdeen. IOF thanks PAOS, JOPS, JPOS, and POPS for the excellent collaboration.

At the Jordan Meeting, IOF recognized the work of young researchers, granting IOF Young Investigator Awards of 1000 USD to the five highest ranked abstracts by researchers aged 40 and under.

In conjunction with the Dead Sea meeting, a total of 17 young researchers from the region were invited to take part in the first IOF Young Investigator Mentoring Programme. This was the pilot session introducing a series of exclusive hands-on workshops that will take place at IOF Regionals in the future.

WORLD OSTEOSPOROSIS DAY LAUNCH IN MINNEAPOLIS

The North American launch of the new IOF Capture the Fracture report was held on October 11, 2012 at a well-attended event in Minneapolis, hosted by IOF together with the National Osteoporosis Foundation (NOF), National Bone Health Association (NBHA) and Osteoporosis Canada. IOF’s World Osteoporosis Day focus on secondary fracture prevention was perfectly aligned with the NBHA’s 2Million2Many campaign, which is working to improve post-fracture care and support for patients with the goal of reducing the 2 million bone breaks that occur every year in the country.
IOF's Committee of Scientific Advisors (CSA) develops important scientific programmes and publishes influential reviews, guidelines and position papers. CSA members are active in 12 working groups and participate in multinational research projects.

In 2012 the CSA Working Groups published nine key reviews and position papers, continuing a productive trend that has seen a surge of influential papers published over the past three years.

DO-HEALTH STUDY

IOF is a partner in a new international study that was launched on February 3 at the University of Zurich. The DO-HEALTH study (VitaminD3-Omega3-Home Exercise-Healthy Ageing and Longevity Trial), Europe’s largest healthy ageing study, expects to provide evidence for the efficacy and safety of three simple preventive interventions: vitamin D, omega-3 fatty acids and a simple home exercise programme.

INTERACTIVE MAPS

Vitamin D Map

- Overview of the vitamin D status in healthy populations worldwide
- Based on 200 studies from 46 countries
- Two age categories: children (<18 years) and adults
- Four colour coding according to mean (or median) vitamin D levels

FRAX Map

- 10-year probability of a major osteoporotic fracture
- Data from 45 FRAX models available in 40 countries
- Colour coding according to probability (%) designated as low, intermediate and high

Hip Fracture Incidence Map

- Data from 63 countries
- Colours according to risk designated as high, medium or low
- Maps for women, men and both sexes combined
FRAX

IOF supports the development of, and logistical support for, the WHO Fracture Risk Assessment Tool (FRAX®). FRAX, which assesses 10-year probability of fracture, is being used by clinicians around the world to make informed treatment decisions. In 2012, FRAX version 3.7 was released and models made available for 47 countries/territories and in 24 languages.

FRAX is freely available online at www.shef.ac.uk/FRAX. It is offered in several interface options and can be licensed as an iPhone App or desktop application at www.who-frax.org.

www.iofbonehealth.org/pio
In 2012 IOF held, for the first time, key scientific and educational meetings in each of four world regions. Altogether more than 7000 delegates attended IOF meetings or training courses in Asia-Pacific, Europe, Latin America and Middle East & Africa. Featuring the latest clinical research and high standards of CME-accredited health professional education, IOF meetings have become leading bone events around the world.

**IOF’s Flagship Training Course in Geneva**

The 21st IOF Advanced Training Course on Osteoporosis was held from January 31-February 2, 2012 in Geneva Switzerland. Chaired by Professor Socrates Papapolous, IOF’s flagship training course for up to 200 delegates offers CME accreditation and is led by a renowned faculty. The course has provided comprehensive training in osteoporosis to more than 4000 health professionals over the past two decades.

**IOF Endorsement of Member Society Meetings**

Each year IOF provides support for a selected number of meetings and conferences held by its member societies, either through endorsement, provision of speakers and/or funding. The meetings are listed on the IOF website at www.iofbonehealth.org/past-meetings-and-events
IOF AWARDS PRESENTED IN BORDEAUX

IOF Medal of Achievement
Professor Cyrus Cooper was the recipient of this important award in recognition of his outstanding research contributions to the epidemiology of osteoporosis.

IOF Pierre D. Delmas Award
Professor Bess Dawson-Hughes was presented with IOFs Pierre D. Delmas Award in recognition of her significant and unstinting contribution to the advancement of the work of the IOF.

IOF-Servier Young Investigator Research Grant
This valuable grant of 40 000 EUR was awarded to Dr Mark Edwards, clinical research fellow at the MRC LifeCourse Epidemiology Unit at Southampton General Hospital in the UK, to support research on relationships between body composition, muscle and bone strength.

Pierre Delmas Prize: An ESCEO-IOF-Servier Achievement Award
This important award was presented to Professor Rene Rizzoli, Professor of Medicine at the University Hospitals of Geneva, in recognition of his outstanding work in the area of metabolic bone diseases, osteoporosis and bone nutrition.

2nd Herbert A. Fleisch ESCEO-IOF Medal
The eminent Danish researcher Dr Claus Christiansen was honoured for his pioneering work in many areas, including the development of densitometry, markers of bone turnover and clinical trials.

COMMUNICATING IOF SCIENCE NEWS
Via regular e-blasts and its monthly newsletter ‘BoneBlast’, IOF communicates science news to a large database of interested health professionals, members and policy makers. In addition, regular press releases issued via the scientific news agency EurekAlert serve to highlight important guidance and position papers to an audience of more than 8000 health journalists worldwide.
GLOBAL OUTREACH & Public Awareness

NEW IOF WEBSITE EXPANDS BONE, MUSCLE AND JOINT HEALTH OUTREACH

In March 2012 IOF re-launched its website www.iofbonehealth.org with a modern new design, new content and an enhanced and improved user-experience. The website’s new features include an interactive national society finder map, interactive maps, and new sections with information on osteoarthritis and sarcopenia (reflecting IOF’s broadening focus on bone, muscle and joint disorders).

IOF’s community outreach is supported by a growing number of visitors to our active Twitter and Facebook pages.

OSTEOLINK

OsteoLink is the first online and in-person social network for people with osteoporosis, their friends, families, and healthcare professionals in Europe and Australia. An initiative of the International Osteoporosis Foundation and the Division of Bone Diseases at the Faculty of Medicine, University of Geneva, OsteoLink operates globally and at the country level, working with our network of IOF member National Societies. OsteoLink is currently available in Australia, Austria, Sweden and Switzerland with more countries launching soon.

www.osteolink.org
World Osteoporosis Day (WOD) on October 20th marks the pinnacle of a year-long campaign to educate and spread awareness of osteoporosis and bone health around the world. Each year the IOF-led WOD campaign reaches out to the public and patients, health professionals, media and policy makers. IOF’s more than 200 member societies are provided with campaign publications and posters in seven languages and are encouraged to use these tools for their own national WOD campaigns.

IOF’s popular 2012 WOD campaign focused on the important issue of secondary fracture prevention. Although fractures have enormous personal and health-economic impact, over 80% of people who experience fractures are neither diagnosed nor treated for osteoporosis. In an effort to close the care gap, IOF issued a new report directed at health professionals and a patient-oriented campaign under the “Stop at One” banner – calling on all adults over 50 to ask for osteoporosis testing following a first fracture.
STOP AT ONE MAKE YOUR FIRST BREAK YOUR LAST

The clear message on posters and brochures calls on fracture patients aged 50 and over to insist on testing and treatment to prevent secondary fractures.

Campaign materials and an events listing are available on the newly designed World Osteoporosis Day website www.worldosteoporosishday.org.

CAPTURE THE FRACTURE A GLOBAL CAMPAIGN TO BREAK THE FRAGILITY FRACTURE CYCLE

Published for World Osteoporosis Day, this informative report calls for concerted worldwide efforts to stop secondary fractures due to osteoporosis through the implementation of coordinator-based models of post-fracture care. The report is available in seven languages on the IOF website.
IOF Staff

IOF staff at headquarters in Nyon, Switzerland and in regional offices in Dubai, Buenos Aires and Singapore, are responsible for carrying out the many IOF projects and programmes as well as fundraising, member services and liaison, publication management and congress/meeting organization.

MAJD ZEITOUN
IOF Middle East & Africa Regional Assistant
From a financial standpoint I am pleased to report a 24% increase in revenue for 2012. The proportionally lower increase (17%) in operating expenditure reflects the increased output in the area of regional meeting organization. Consequently we have also seen a strong and welcome increase in the operating gain in 2012 of 582,000 CHF as compared to 186,000 CHF in 2011.

Both fundraising and congress organization play a central role in terms of IOF operations and staff responsibilities. Within one year, with its relatively small staff, IOF successfully staged four large regional meetings and the annual training course in Geneva. This was accomplished while advancing an array of new and ongoing programmes, an extensive World Osteoporosis Day campaign and the publication of the first Latin American Regional Audit. These accomplishments deserve recognition! Congratulations to the staff for their tremendous efforts and a job well done.

Investment income and expenditure have remained stable and we hope that 2013 will see significant growth in this area.

On behalf of IOF I would like to thank our Committee of Corporate Advisors as well as other corporate sponsors who have shown their continued commitment to IOF. Their support has permitted us to increase public and health professional outreach more than ever before.

I would also like to acknowledge our auditors, BDO, for their expert and timely services.

As we head into 2013 we look forward to another year of extensive programming and positive growth based on a healthy and stable financial foundation.

### Notes to the Financial Statements

**International Osteoporosis Foundation - USA, Inc.**

In order to establish a legal presence in North America “International Osteoporosis Foundation - USA, inc” was established on December 2, 2004 as a not-for-profit corporation organized under the Not-For-Profit Corporation Law of the State of New York.

In 2012 a correction of CHF181,494.60 (USD191,127.42) is booked related to an error on the inclusion of the IOF USA, Inc. accounts in the 2010 financial statements. This correction has no impact on IOF's capital build-up: the gain for the year of 400,460.20 CHF is added to capital.

### Risk Assessment

A risk analysis was performed in December 2010 by the CEO and IOF's President. The risk analysis was presented to the Board in March 2011. In December 2011 the risk assessment performed in 2010 was updated by the CEO and IOF's President and presented to the Board in March 2012.

### The 206 A Bone Fund

Following a decision by the Board of the Foundation, the 206 A Bone fund was liquidated during 2012. The assets invested in securities was combined with IOF's investments and the fund's capital was added to IOF's capital. This decision was taken because the 206 A Bone fund had served its purpose over the years and the application of the assets and capital are similar to those of IOF's main assets and capital.
